HR and Payroll Management System

Project Overview

HR and Payroll Management System is a web-based application developed using Oracle APEX, Oracle Database, SQL, and PL/SQL.

The system is designed to manage employee information, attendance, leave, salary, payroll, and inventory-related information through a centralized application.

Features / Modules

HR Management

- Department Management
- Employee Management
- Employee Details

Attendance Management

- Attendance Records
- Attendance Details

Leave Management

- Leave Records
- Leave Status Management

Payroll Management

- Salary Management
- Overtime Management
- Payroll Management
- Payroll Details

Inventory Management

- Product Management
- Stock Inventory
- Available Stock

Technologies Used

- Oracle APEX
- Oracle Database
- SQL
- PL/SQL
- Microsoft Excel

Database Design

The application uses a relational database structure with primary keys and foreign keys to maintain relationships between related entities.

The database structure is documented in the ER Diagram.

ER Diagram

![ER Diagram](Documentation/ER_Diagram.png)

SQL

SQL was used for:

- Creating database tables
- Defining primary keys
- Defining foreign keys
- Data retrieval
- Filtering and reporting
- Managing relational data

The database creation scripts are available in the Database folder.

Oracle APEX

Oracle APEX was used to develop the web-based application interface.

The application includes:

- Forms
- Reports
- Navigation

- Page Processes
- Dynamic Actions
- Data Management Pages
- Dashboard and reporting pages

The exported APEX application is available in the Apex folder.

Excel Data

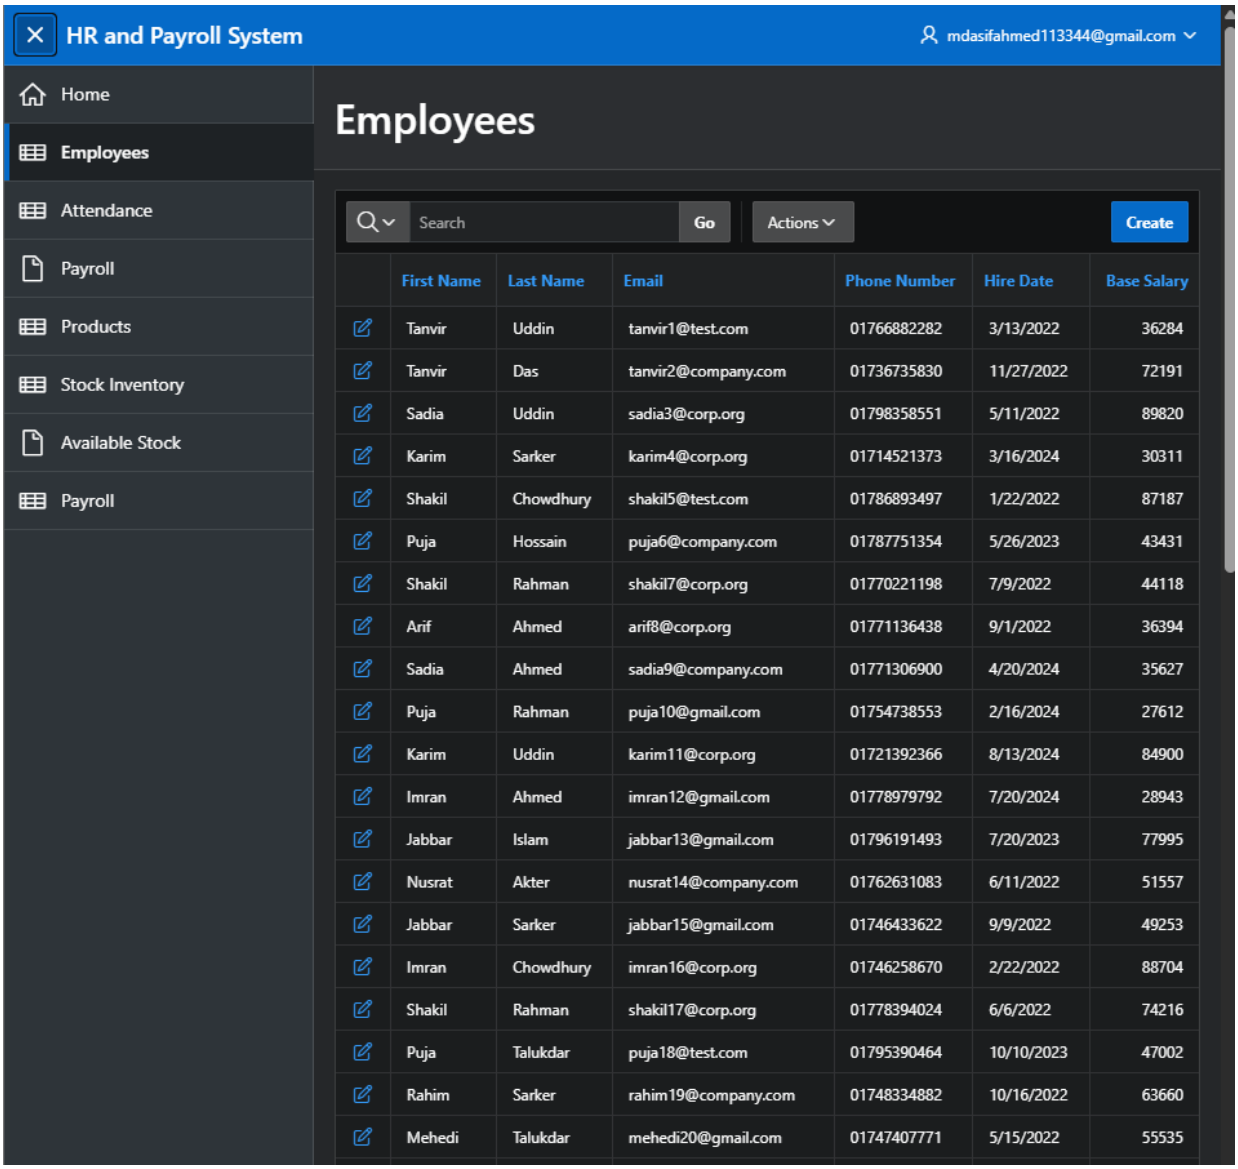

Microsoft Excel was used for preparing and managing sample data before importing it into the database.
